

**(MS)²TC and NASA/ARISS Radio Contact with the
International Space Station Event**

Logo Design Competition

To promote our school's participation in the 2014 NASA/ARISS (Amateur Radio on the International Space Station) program, we are holding a logo design competition. The logo design will be used on promotional material and as a representation of our school's involvement in a once in a lifetime experience for the program's students, teachers, administration, and our district.

Your entry should ...

- incorporate the current (MS)²TC logo
- include the acronyms "NASA" and "ARISS"
- NOT use any present or past NASA or ARISS logos
- work both in color and black and white (design outline should be distinct if colors are removed)
- be original artwork
- be neatly drawn with sharp outlines
- use saturated colors if coloring
- be adaptable to different scales and different uses (i.e. on posters, projected image, hard copy ...)
- be inspiring, smart and memorable
- be relevant to themes of education, space exploration, technology or communication as they relate to the ARISS program (to learn more about ARISS, visit the following webpage, <http://www.ariss.org/>).

From the entries received the (MS)²TC faculty will choose the winning design. **ALL (MS)²TC students are required to submit a logo design entry!**

Submit your logo designs to your ELA teachers, Mrs. Duddles or Mrs. Purvis

by Friday, January 24th.
